

DO YOU SMILE AT DAD JOKES?

Take dental care seriously with tips especially for men.

Do you know what one of the most common factors associated with infrequent dental checkups is? Simply being male. It's true. In fact, women are more proactive than men in maintaining their teeth and gums.* Changing this statistic doesn't have to be hard. It's just a matter of men taking better care of their mouth, visiting the dentist regularly and taking proper precautions. And we're here to help with some simple tips that apply especially to a man's everyday life.

Taking medication?

Certain heart, blood pressure and antidepressant medications may reduce the amount of saliva in your mouth, increasing the risk for cavities.** Here are some tips to help restore moisture to your dry mouth:

- › Drink plenty of water
- › Use sugar-free candy or gum to stimulate saliva flow
- › Replace moisture with artificial saliva and oral rinses
- › Breathe through your nose - not your mouth
